THE LOCAL SEO DOMINATOR

CONTENT MANAGEMENT SYSTEM

VERSION TWO
By Jeff Childers

INSTRUCTIONS

PHP 5 & Above – No Database Needed

This version creates a page for each city location.

This version is the same as version one accept this displays all zipcodes for one city instead of creating a page for each zipcode this version only creates a page for each city. It will display all zipcodes for each one city.

You must use these tags in your urls in this specific order.

[city] [state]   NO ZIPCODE TAG!

http://mydomain.com/[city]-[state]-roofer.html

Example:

http://mydomain.com/Norfolk-Virginia-Plumber.html

This must be done in this order.
[city] [state]
